

Question: For the Exam Web Page, please choose the best answer for this test:

Test ID: 9.B

Test Name: 3.2.3-consistent-navigation

Test Condition: Each navigational element occurs in the same relative order with regard to other repeated components on each web page where it appears.

Exam Web Page

- ☒ a. **Pass** - Each repeated component occurs in the same relative order with regard to other repeated components on each web page where it appears. ✖
- ☐ b. **Fail** - A repeated component occurs in different relative order with regard to other repeated components on a web page where it appears.
- ☐ c. **Does Not Apply** - The web page does not contain components that are repeated on other web pages.
- ☐ d. **Fail** - A repeated component occurs in different relative order with regard to other repeated components but there less than five such components.
- ☐ e. **Not Tested** - A repeated component occurs in different relative order with regard to other repeated components but it is easy to see.
