

**Question:** For the Exam Web Page, please choose the best answer for this test:

**Test ID:** 11.B

**Test Name:** 3.1.2-part-language-defined

**Test Condition:** The human language for any content segment that differs from the default human language of the page can be programmatically determined.

Exam Web Page

- ☐ a. **Does Not Apply** - There is no differing language segment on the page.
- ☐ b. **Pass** - The human language for any content segment that differs from the default human language of the page can be programmatically determined.
- ☐ c. **Fail** - The language code for the content segment that differs does not need to be specified, because it is less than a paragraph.
- ☒ d. **Fail** - The human language for a content segment that differs from the default human language of the page CANNOT be programmatically determined. ✖
- ☐ e. **Not Tested** - The language code for the content segment that differs is valid per ARIA.
