

Question: For the Exam Web Page, please choose the best answer for this test:

Test ID: 15.A

Test Name: 1.3.2-content-order-meaning-CSS-position

Test Condition: The reading order of the content (in context) is correct and the meaning of the content (in context) is preserved without CSS positioning.

Exam Web Page

- ☐ a. **Fail** - The sequence and meaning of the content, in context, is NOT understandable without CSS positioning.
- ☐ b. **Does Not Apply** - There is no content positioned using CSS.
- ☐ c. **Fail** - The sequence and meaning of the content does not matter because the page is laid out clearly.
- ☐ d. **Fail** - The sequence and meaning of the content is confusing without CSS positioning but only for a few users.
- ☒ e. **Pass** - The sequence and meaning of the content, in context, is understandable without CSS positioning.
