Question: For the Exam Web Page, please choose the best answer for this test:

Test ID: 5.D

Test Name: 3.2.2-on-input

Test Condition: Changing field values/selections (e.g., entering data in a text field, changing a radio button selection) does NOT initiate an unexpected change of context.

Exam Web Page

○ a. **Pass** - Changing the value of a form element does not initiate an unexpected context change.

○ b. **Fail** - Changing a form field value initiates an unexpected but minor context change.

◉ c. **Does Not Apply** - There are no focusable form elements on the page. ✔

○ d. **Not Tested** - Changing a form field value causes an unexpected context change that can be ignored.

○ e. **Fail** - Changing the value of a form element causes an unexpected context change.
